**RE: TOWN OF GAINES ZONING BOARD - DOLLAR GENERAL- DRAFT SEQR
MRB GROUP PROJECT NO. 0721.18001.000
CE No. 18-1294**

Dear Mike:

The coordinated review portion of the above referenced project is not complete due to additional information requested by the State Historic Preservation Office (SHPO). Once SHPO has completed their review the Board may proceed with the SEQR process. Enclosed for your review, please find the following DRAFT SEQR documents:

- A DRAFT copy of Parts 2 and 3 of the Full Environmental Assessment Form.
- A suggested DRAFT resolution to become lead agency.

To date we have received no objection to the Zoning Board's request to serve as Lead Agency. We received correspondence from the State Historic Preservation Office (SHPO) requesting additional information. Additionally, we received correspondence from the New York State Department of Transportation concurring with the Town designation as lead agency. We have not received any other comments from any Involved Agencies or Interested Parties.

We recommend the Board not "declare itself Lead Agency" until SHPO has issued its recommendations and once the applicant has addressed any concerns.

Upon your review should you have any questions, please do not hesitate to call.

Sincerely,

Jonathan D. Hinman, P.E.
Project Manager

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
Project :
Date :

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “Yes” to a numbered question, please complete all the questions that follow in that section.
- If you answer “No” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: ☒ Type 1 ☐ Unlisted

Identify portions of EAF completed for this Project: ☒ Part 1 ☒ Part 2 ☒ Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
Town of Gaines Zoning Board as lead agency that:

☐ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

☒ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

**EAF - Part 3 Narrative
Town of Gaines – Dollar General
July 30, 2018**

The Town of Gaines Zoning Board received a completed Full Environmental Assessment Form (Part 1) from the applicant for the Dollar General - Gaines. The overall project consists of the construction of an 9,100 square foot retail store.

The Town of Gaines Zoning Board has evaluated the proposed project using the criteria for determining significance identified in 6 NYCRR 617.4 and 617.5. Based upon an assessment of the magnitude and importance of potential impacts, no potential large environmental impacts have been identified and it is concluded that the proposed action will not have an adverse impact on the environment.

The following information is provided to document small potential impacts identified for the proposed action.

3-1 Impact on Land

The project involves the disturbance of approximately 1.37 acres of land. Land disturbance will involve the construction of the retail store, parking area and septic system. Additionally, the disturbance will consist of the creation of post-construction stormwater management facilities. Once the work is completed, the disturbed areas will be regraded, topsoil will be installed, the area will be re-seeded and vegetation will be restored.

No work will take place on areas identified with slopes of 15% or greater. All areas will have storm water protection measures installed prior to construction to minimize potential impacts due to the grading work. Post-Construction stormwater management facilities will be installed as part of the project to minimize impacts due to the disturbance.

3-3 Impacts on Surface Water

The project involves the disturbance of approximately 1.37 acres of land. Land disturbance will involve the construction of the retail store, parking area and septic system. Additionally, the disturbance will consist of the creation of post-construction stormwater management facilities. Once the work is completed, the disturbed areas will be regraded, topsoil will be installed, the area will be re-seeded and vegetation will be restored.

No work will take place on areas identified with slopes of 15% or greater. All areas will have storm water protection measures installed prior to construction to minimize potential impacts due to the grading work. Post-Construction stormwater management facilities will be installed as part of the project to minimize impacts due to the disturbance.

3-4 Impact on Groundwater

The retail store will make a connection to the public water system and generate waste that will be mitigated by the installation of a new septic system.

3-10 Impact on Historic and Archeological Resources

The project is located with an archaeological sensitive area. The proposed improvements are located directly across from a building listed as National Historic Landmark. The State Historic Preservation Office has been consulted and is reviewing the project. SHPO has requested that measures be taken

to preserve the landmark. Relocation of the proposed improvements has been requested for consideration. No final determination has been received.

3-15 Impact on Noise, Odor and Light

The project will not produce operating noise exceeding the local ambient noise level. Minor increases in noise may occur during the construction period; however, any impacts on ambient noise levels will be temporary in nature and will only occur during normal work hours, approximately 7:00 am - 5:00 pm Monday - Friday.

Light will be installed around the building however the plan will only impact the store property limits.

There are no anticipated impacts on odor as a result of the project.

SEQR Designation

On June 4, 2018 Part 1 of the EAF was sent to Involved/Interested Agencies along with the intent for the Town of Gaines Zoning Board to act as Lead Agency under the SEQR process.

Agencies Notified:

- Orleans County Planning Department (Interested Agency)
- Orleans County Health Department (Interested Agency)
- New York State Department of Transportation (Interested Agency)
- State Historic Preservation Office (Interested Agency)
- Town of Gaines Town Board (Interested Agency)

A 30-day period was provided for comments on the Town's request to be Lead Agency for the project. No objections to the Town of Gaines Zoning Board acting as Lead Agency were received.

The State Historic Preservation Office requested additional information and will conclude their review no later than August 13, 2018. Correspondence was received from Kevin Bush, Regional Director Region 4 New York State Department of Transportation on June 14, 2018. No others correspondence was received regarding this matter.
